

WHITELISTING FOR CENTRAX NEXT GEOCODE

The following document contains the necessary information needed to ensure a connection to the Marquis Cloud geocode process. Provide this document to your IT department so they can whitelist access from your CenTrax NEXT environment to the geocoding service.

Whitelist the following	
IP Address	20.109.238.52
URL	app.services.cloudmarquis.com
Ports	80 and 443

The whitelisting procedure will vary depending on your organization's firewall and network configuration. Once the settings above have been applied for your CenTrax NEXT environment, the geocode process within the application will operate without error.

Please reach out to csupport@gomarquis.zendesk.com should you have any questions.
